DETAILED ACTION

Drawings

1. The drawings are objected to because the disclosure fails to describe the "space" or "gap" that is enclosed by package lid 10, substrate 24 and semiconductor IC 26; and that surrounds chips 36 and/or 38 [see figures 2A and 2C]. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-21 and 31-32 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for forming the molding compound on the exterior surface of the sloped wall, does not reasonably provide enablement for the use of the term “only” as recited in the amended claims. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims.

In addition, the disclosure fails to describe how the chips (36) and (38), and the interior walls of the package lid (10) are protected from being encapsulated with molding compound (30), especially when vents or holes are provided on the package lid (10) [see paragraphs 0025 and 0026 in applicant’s specification]. Please note that these holes or vents inherently allow air and/or the molding compound to pass through the package lid to form an encapsulant for enclosing an “internal” chip [see figure 3 in Fishley et al. (US 6,654,248); figure 2 in Tang et al. (US 6,246,115 B1); figure 4 in Yang et al. (US 6,433,420 B1); figure 2 in Liu et al. (US 6,486,564 B2); and figure 2 of Liu et al. (US 6,278,182 B1)].

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. As far as understood, claims 1, 3-5, 7-10, 15, 19, 21 and 31 remain rejected under 35 U.S.C. 102(e) as being anticipated by Fishley et al. (US Pat. No. 6,654,248 B1).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. As far as understood, claims 2, 6, 16, 17 and 11-14 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Fishley et al. (US Pat. No. 6,654,248 B1) in view of Tang et al. (US Pat. No. 6,246,115 B1).

Response to Arguments

8. Applicant's arguments with respect to claims 1-21 and 31-32 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
